Importing references downloaded from SciFinder into EndNote

To import references downloaded from SciFinder to your computer, click on Collect, then click on Import References.

Find the references downloaded from SciFinder to your computer (usually, they will be in the Downloads folder).

Make sure this option is selected to import references from SciFinder and other databases.

Click on "Select Favorites" and select SciFinder (CAS).

Click on "Collect" and choose "Import References" to import references downloaded from a database (e.g., SciFinder).

Make sure this tab is selected.

Once you select SciFinder as a Favorite, it will show up as an import option.

Import to a new or an existing group.
