EMBARKING ON A SYSTEMATIC REVIEW PROJECT?

Librarians can help!

We offer expert searching assistance, connect you with tools to help you through the process, and deliver workshops.

https://www.lib.umd.edu/rc/systematic-review
Libraries Systematic Review Service

Tier 1: General consulting - we offer assistance to researchers interested in how to do a regular literature review. In a one hour in-person consultation, we will provide a basic overview of the systematic review process such as developing a protocol, designing a search strategy, selecting relevant databases, collecting and organizing studies, screening the results and writing the manuscript.

Tier 2: Credit given as acknowledgement - at this level, we offer assistance in generating key terms, creating search strings for specific databases, and/or reviewing search strings created by the researcher. The researcher should acknowledge the librarian in the final publication.

Tier 3: Credit given as co-authorship - at this level, we develop the search strategy, execute the searching in various databases, manage the studies and prepare them for screening by the researcher and write any portion of the search methodology. The researcher should agree to include the librarian as a middle author.

CONTACT A LIBRARIAN:

Sarah Over
Engineering Librarian
